

AI AGENT SOLUTION

WHATSAPP INTERFACE

Empowering the Invisible

An AI agent that turns domestic workers in India into verified, job-ready professionals — through a WhatsApp conversation in their native language.

10 Million+
INVISIBLE WORKERS

Hindi/Bengali/Tamil
VERNACULAR VOICE

ARCHITECTURE PITCH

System Architecture

Three integration layers powered by a single WhatsApp contact number. Transforming conversational voice notes into structured, job-ready credentials.

System Architecture

Voice & Access

Dual WhatsApp Cloud API and Twilio fallback channels. Captures OGG/MP3 voice notes instantly. Feeds native dialect voice to the processing cluster.

Cognitive Engine

STT via Sarvam AI and Bhashini APIs. Orchestrated via Claude API (Haiku) with prompt templates to run skill extraction and structured profile builders.

Jobs & UI Layer

Location-based filters matching scraped Apna.co and WorkIndia API jobs. Presents a visual React dashboard for live credential tracking.

User Journey Map

Strategic Work Allocation

AI ENGINEER

P1

Conversation & Brains

- ▶ Claude API Integration
- ▶ Skill assessment logic
- ▶ Roleplay prompt engineer
- ▶ Conversation state flow

BACKEND DEV

P2

Integration & Infrastructure

- ▶ Twilio & WhatsApp hooks
- ▶ Sarvam Audio APIs
- ▶ Firebase db models
- ▶ Apna scraper & server

FRONTEND DEV

P3

Dashboard & Presentation

- ▶ Dashboard component tree
- ▶ Interactive Skill Cards
- ▶ Pitch deck assets
- ▶ Product video walk-through

THE IMPACT NARRATIVE

Pitch Narrative & Story

Connecting technological architecture directly to real-world impact. A cohesive structure designed to address empathy, friction, and systemic inclusion.

Kamla's Story

"Kamla has worked across Mumbai for 11 years. She cooks like a chef, manages households, and is extremely trustworthy. But when asked for background proof, she has absolutely nothing."

— Invisible to the System

There are over **10 million women** in India facing this exact wall. Outstanding capability but zero formal tracking to prove it.

Why Existing Solutions Fail

Resume Requirements

Standard job portals require resumes. Kamla has never drafted one and does not have documents to compile.

Language Barrier

Existing systems demand fluent English. Kamla speaks Hindi, Bengali, or Marathi exclusively.

High Friction App Install

Most tech requires app store navigation. Kamla uses only basic WhatsApp for voice recording.

The Solution: How it Works

RozgarDidi meets Kamla exactly where she is.

Simple WhatsApp Native Chat

Starts immediately with a simple voice greeting in her localized native tongue.

5–Minute Skill Profiling

Conversational parsing structures experience metrics into a formal profile block.

Live Dashboard Visuals

Generates a dynamic UI skill card, direct local matches, and immediate prep tools.

SYSTEM COGNITIVE ENGINES

Prompt Structure & Scoring

Behind the simple conversational interface runs a powerful combination of structured system instructions, profile state extraction, and weighted algorithms.

Agent Prompt Architectures

PROMPT 1

Claude Haiku

Conversational Skill Extraction

Guides the 6–8 conversational question tree turns in simple localized dialects (Hindi, Tamil, Bengali). Reassures the user, avoids Aadhaar prompts, and enforces natural turn mechanics.

```
OUTPUT: Structured JSON
{
  "name": "Kamla Devi",
  "experience_years": 11,
  "skills": ["Cooking", "Veg Cuisines"],
  "preferred_area": "Mumbai West"
}
```

PROMPT 2

Roleplay Engine

Interview Roleplay Simulator

Triggers immediately once the profile cards are stored inside Firebase. Plays the mock employer persona, executing 4–5 core interview loops, grading responses, and providing gentle confidence tips.

```
"Bahut achha! Aap yeh bhi add kar sakti hain: [employer reference]... daro mat, aap taiyaar hain."
```

Weighted Scoring & Closing

Algorithmic Matching Engine

Match Parameter	System Weight	Target Logic
Skills Match	40% / 40 pts	Specific cuisine or specialty checks
Location Proximity	25% / 25 pts	Transit boundaries & local sectors
Language Fit	20% / 20 pts	Dialect baseline alignment
Work History	15% / 15 pts	Experience range & reference checks

The Vision
10 million domestic workers. One WhatsApp number. No translation apps, zero resume drafting blocks. RozgarDidi — because every worker deserves representation.
